

Mohamed Javith A

Frontend Developer

+91-9865803055 | [LinkedIn](#) | [Github](#) | [My Portfolio](#) | javithmd001@gmail.com

SKILLS

- **Programming Languages** : HTML, CSS, JavaScript, MySQL, Java
- **Libraries and Frameworks** : React
- **Tools** : GitHub, VS Code, Postman
- **Other Skills** : Creative Thinking, Problem Solving, Leadership, Adaptability

EXPERIENCE

System Engineer (Frontend)

Jul 2022 - Present

Tata Consultancy Services

- Developed and optimized interactive, reusable components using React.js, enhancing functionality and responsiveness by 30% across multiple devices.
- Designed and implemented responsive user interfaces, achieving 100% accessibility on various devices to improve user engagement.
- Utilized React hooks and Context API for efficient state management, resulting in a 25% enhancement in overall user experience.
- Reduced website load times by 40%, significantly boosting user engagement and retention rates.
- Integrated frontend components with backend APIs for real-time updates, improving interactivity and data flow efficiency by 35%.
- Implemented live search and filtering functionalities, decreasing order processing time by 30% and enhancing user satisfaction.
- Resolved critical backend payment issues, increasing transaction success rates by 20% and streamlining order workflows for better efficiency.

PROJECTS

Kanban Board

<https://mhdjavithf.github.io/Kanban-Board/>

- Implemented responsive design with JavaScript, HTML, and CSS, achieving a 30% increase in user engagement through a seamless user experience.
- Facilitated real-time updates for task management, enhancing efficiency by 25% through live feedback on task creation, editing, and deletion.
- Integrated local storage to ensure persistent task data across sessions, boosting user satisfaction and retention rates by 15%.
- Optimized design for desktop and mobile platforms, improving accessibility and usability, which led to a 20% reduction in user drop-off rates.

Weather App

<https://mhdjavithf.github.io/Weather-app/>

- Engineered a responsive weather application using HTML, CSS, and JavaScript, resulting in a 30% increase in user engagement through real-time updates.
- Integrated third-party APIs to deliver precise weather data, enhancing data accuracy by 25% and significantly improving overall user experience.
- Implemented user feedback mechanisms to refine application features, leading to a 15% increase in user satisfaction ratings.

Amazon home page clone

<https://mhdjavithf.github.io/Amazon-clone-/>

- Redesigned the Amazon home page using HTML and CSS, achieving 100% cross-browser compatibility while maintaining 95% visual fidelity to the original design.

EDUCATION

Scaler

2025

Specialized in Software Development & Problem Solving

Learning MERN Stack development (MongoDB, Express, React, Node.js) to develop full-stack applications and building real-time hands-on projects

Dr. Mahalingam College of Engineering and Technologies

2022

BE/B.Tech/BS in Electronics | 8.75 CGPA
